

JEINER DAVID HURTADO IDROBO

FULL STACK WEB DEVELOPER

Málaga, España | +34 604 370 996 | jeinerhurdev@gmail.com | linkedin.com/in/jeiner-hurtado-idrobo | davidhurtado.space

PROFESSIONAL PROFILE

Full Stack web developer with formal training as a Higher Technician in Web Application Development and hands-on experience building projects with Next.js, JavaScript, WordPress, Strapi, Supabase, and PostgreSQL. I've worked on client-acquisition websites, educational platforms, and authentication / access-control systems. I bring prior experience in continuous improvement, Lean Manufacturing, process analysis, and project leadership, combining analytical thinking with a results-driven approach.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React, Next.js, React Native, Astro, Tailwind CSS, Bootstrap, UI/UX, Figma, Responsive Design

Backend / Data: Node.js, PHP, Java, SQL, Supabase, Firebase, Strapi, PostgreSQL, MySQL

CMS / E-commerce: WordPress, WooCommerce

DevOps / Systems: VPS, Docker, Docker Compose, Git, GitHub, VirtualBox, basic network/server administration

Analytics / SEO: Google Analytics, Google Search Console, technical SEO, web optimization

AI / Automation: LLMs, Claude Code, CLI, n8n

PROFESSIONAL EXPERIENCE

MICKREA — Full Stack Developer (Internship)

Málaga, Spain | March 2026 – June 2026

- Built a corporate WordPress website focused on client acquisition and SEO.
- Developed a custom educational platform for training-content distribution.
- Implemented the stack using Next.js, Strapi, Supabase, and PostgreSQL, including authentication and access control.
- Integrated Google Analytics and Google Search Console for tracking and optimization.
- Collaborated on digital and email marketing, aligning development, business goals, and user experience.

CISNES — Warehouse Supervisor

Spain | 2023 – 2025

- Managed receiving, control, and storage of supplies, ensuring continuous availability for daily production.
- Coordinated material preparation and outbound flow to the production floor.
- Applied process-organization principles (5S) to maintain order and traceability.

FEMME INTERNATIONAL S.A.S. — Methods Engineer

Cali, Colombia | February 2021 – May 2022

- Managed production and led continuous-improvement programs on the manufacturing floor.
- Developed and implemented process and production optimization strategies.
- Planned production, defined objectives/KPIs, and coordinated teams.

FERROMATERIALES JDH — Manager (part-time, family business, concurrent)

Cali, Colombia | 2021 – 2022

- Managed the business at a leadership level, overseeing supplies, sales, and finances using Visual Basic and MySQL.

GRUPO FACTORY — Methods Engineer

Cali, Colombia | July 2020 – December 2020

- Coordinated and managed production, ensuring budget and KPI compliance.
- Optimized processes and tracked performance across production stages.

JOHNSON & JOHNSON — Continuous Improvement Assistant

Yumbo, Colombia | May 2019 – May 2020

- Analyzed, standardized, and continuously improved processes.
- Designed, implemented, and tracked KPIs and OEE analysis.
- Led and executed projects using 5S, Lean Manufacturing, and Six Sigma.

RT INDUSTRY S.A. — Production Assistant

Cali, Colombia | July 2018 – February 2019

- Controlled and supervised the production floor and external workshops.
- Analyzed, improved, and standardized methods and timing.

FEATURED PROJECTS

- **ABP Set Pieces — Campus & Tactical Database:** EdTech/SaaS platform for a UEFA PRO coach, combining video-based learning with an AI-assisted tactical set-piece database. Next.js 15, Strapi v5, PostgreSQL.
- **TitanMood — Coach Panel & Client App:** sports-coaching platform (final degree project) with real-time sync between web panel and mobile app via Supabase. React 19, Supabase (RLS), Expo / React Native.
- **Smart Hogar:** WordPress site for a home-automation business, SEO-optimized with Rank Math, Google Analytics, and Search Console.
